Headed Slotted Locator Bushings

Do you have the problem of slotted bushings pushing through the plate?

As a recent addition to our range, these bushings combine the features of traditional slotted locator bushings with an innovative lip that prevents the bushings from being pushed through the jig/fixture, lost on the factory floor, or from possibly becoming an FOD threat.

Harcourt Headed Slotted Locator Bushing info...

Specials Available...

> Carbide

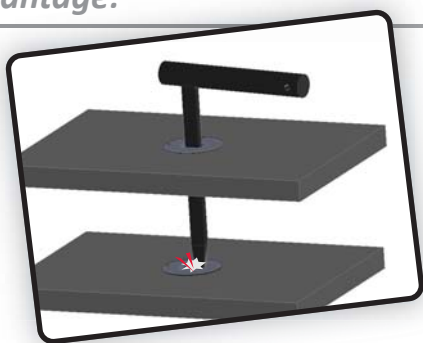

> Stainless Steel

> Special Sizes

Advantage:

With a lip around the top, the HSLB is unable to slip through the jig/fixture if pressure is applied!

Contact us for more information; We would welcome the opportunity to work with you!

5 Benefits

In using our Headed Slotted Locator Bushing:

1. Unique to Harcourt, the head on the bushing prevents it from pushing through the plate.
2. The head also helps align the bushing keeping the slot perpendicular to the jig plate.
3. All Slotted Bushings are EDM'd, not broached, to give you exact tolerances every time.
4. Helps to reduce FOD.
5. Specials are available such as carbide, special sizes and more!
