

HARCOURT CATIA V5® Macros

HARCOURT files for CATIA V5 will be delivered in an archived folder (.zip extension) as CATIA Macro files (.CATscript extension). In order to utilize these files, please do the following...

CATIA V5 Toolbar:

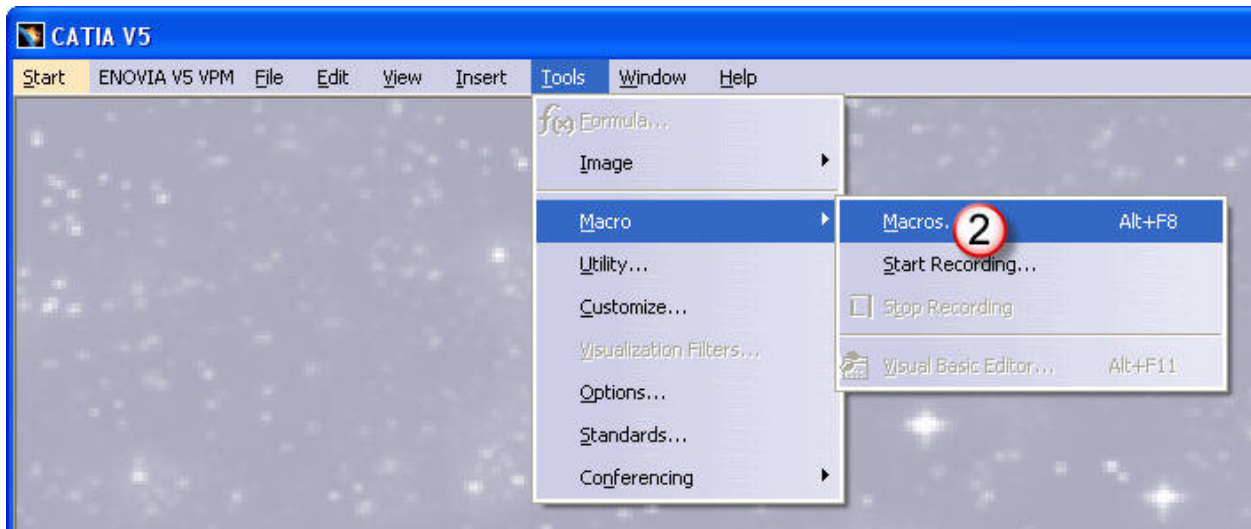

1. Use WinZip (or equivalent program) to extract the files contained in the .zip archive.
2. Start the Macro Dialog from the CATIA V5 Menu (Tools → Macro→Macros), or simply press Alt + F8 to open the macro menu.
3. Locate .CATscript file by selecting **Macro Libraries...**
4. Find an existing library:
 - a. Select **Add existing library...**
 - b.Choose the directory location and select **OK**.
5. Select **Run Macro**.
6. Enter the destination directory where the part will be stored.

Overview:

Step 1: Unzip Folder

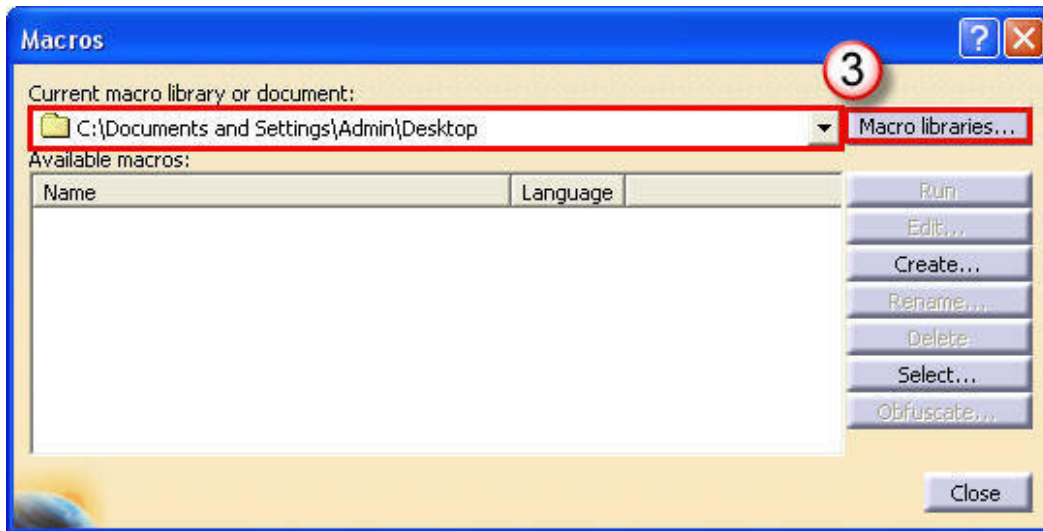

To extract files contained in the .zip archive use WinZip or an equivalent program.

Step 2: Open Macro Dialog

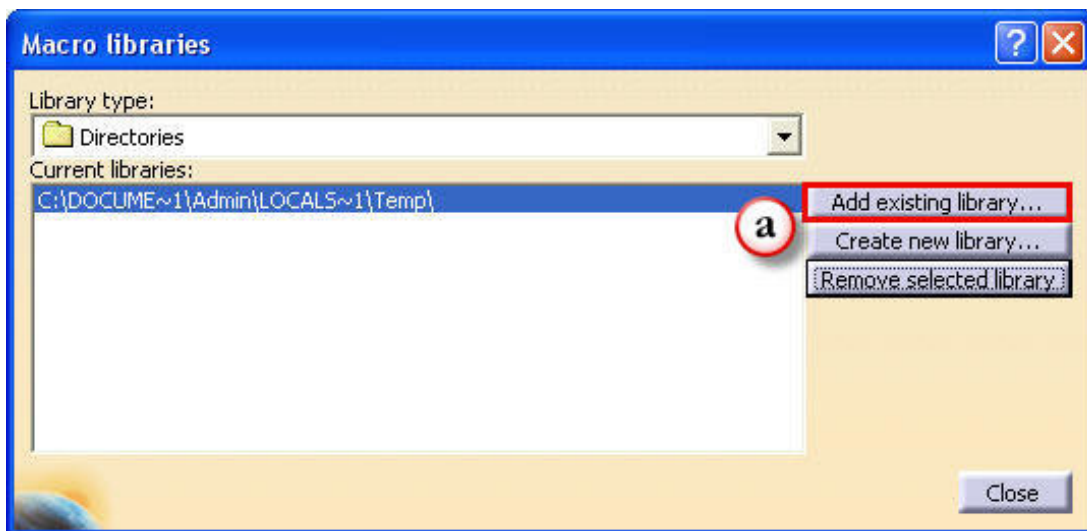

Use the CATIA V5 Menu toolbar: Tools → Macro→Macros. This process can also be done by pressing Alt+F8.

Step 3: Locate .CATscript File

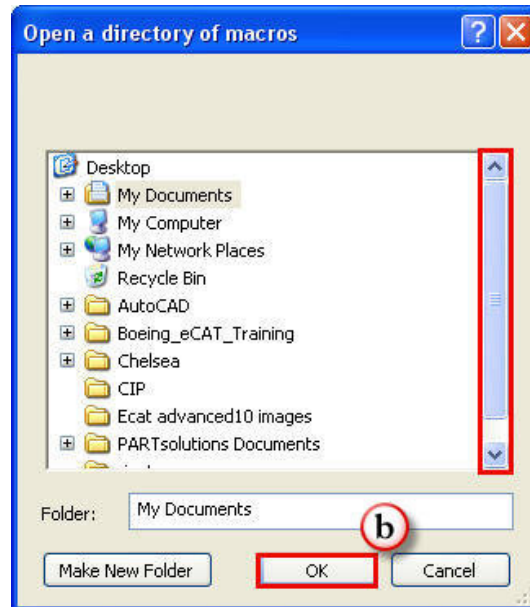

Select file location either from the dropdown box or by selecting “**Macro Libraries...**”.

Step 4a: Add Existing Library

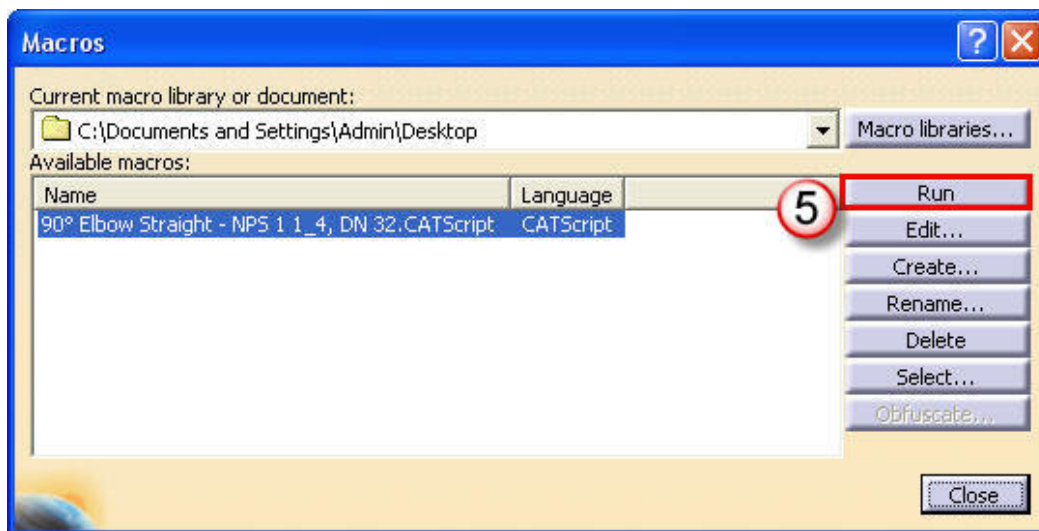

To find the .CATscript file location select “**Add existing library...**”.

Step 4b: Search for Directory

Use the scroll bar to find and select file location and then press “**OK**” to continue.

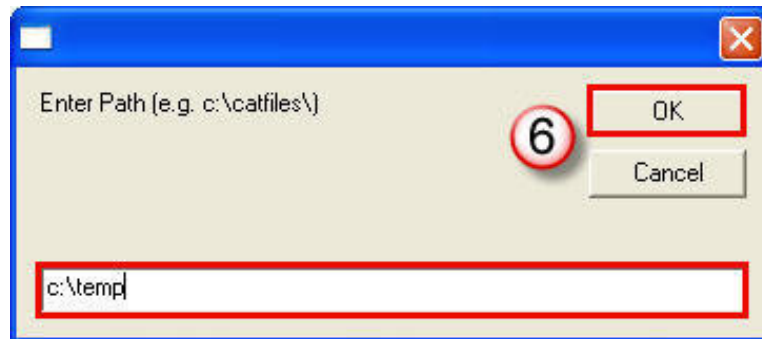

Step 5: Run Macro

Select .CATscript file and then “**Run**” to continue.

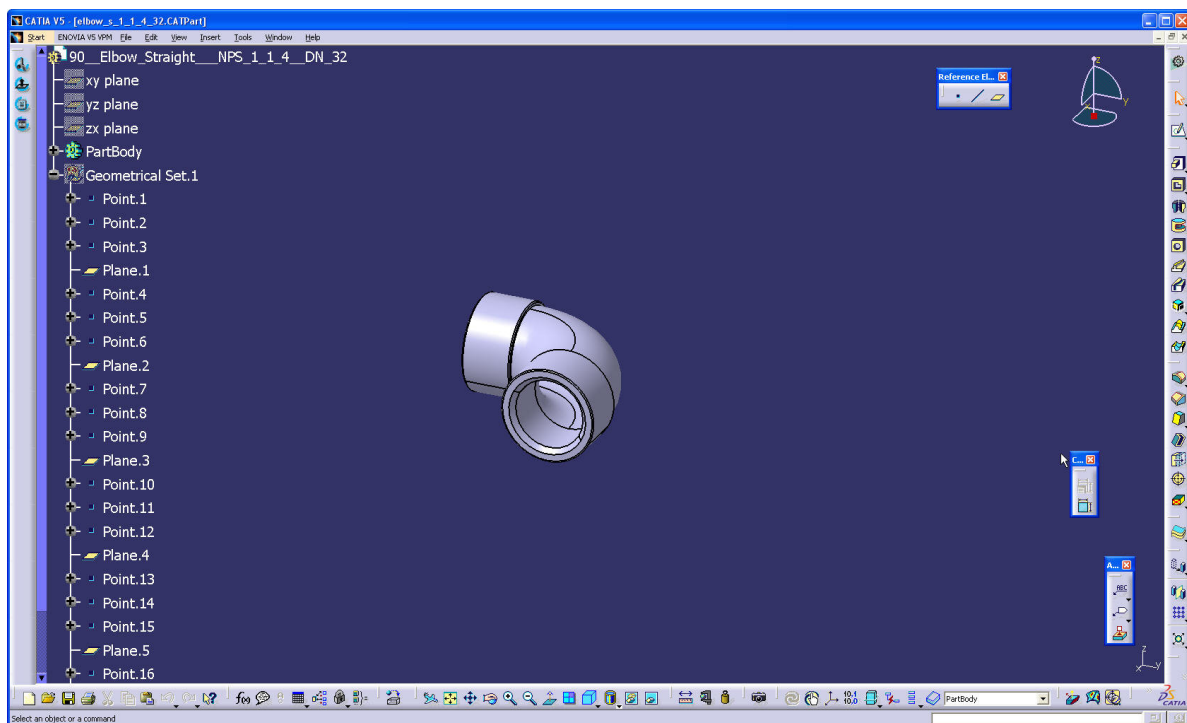

Step 6: Directory Path

Enter the destination directory where the part will be stored then press “OK” to continue.

Congratulations!

The CATIA Macro file process is now complete.
