

Running a macro file in SolidWorks:

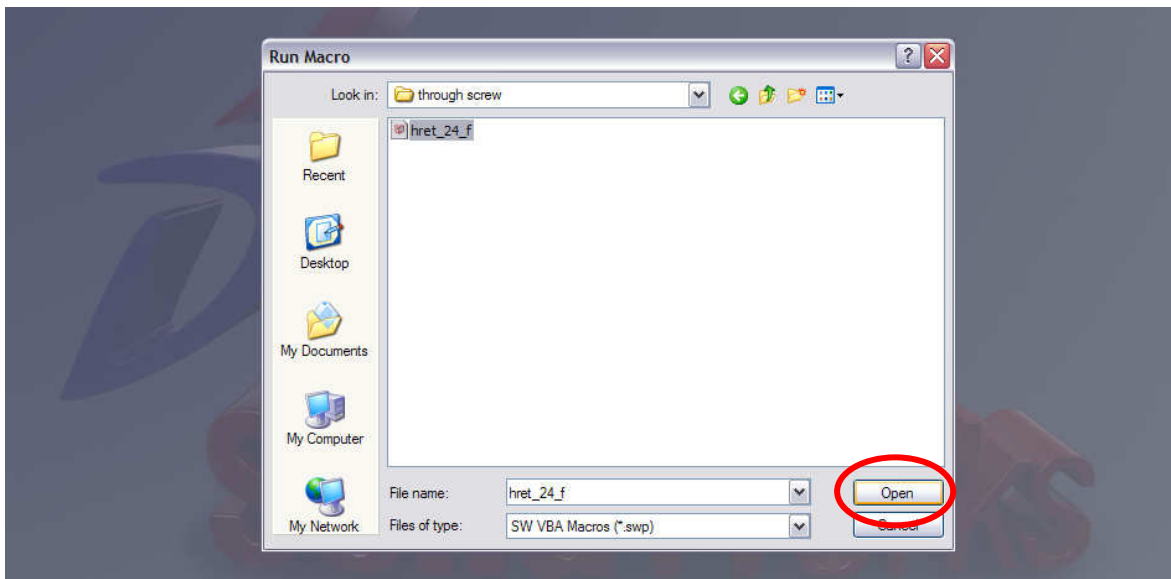

1. Begin by opening SolidWorks.
2. Select the 'Tools' tab on the menu bar across the top of the page.

3. Then go down to 'Macro' in the 'Tools' dropdown, and in the 'Macro' dropdown, click run.

4. In the 'Run Macro' popup, navigate to where your downloaded file is saved, select that file and click 'Open'.

5. Congratulations! You have opened your macro file in SolidWorks!
